Nitebeat

Date: Thursday, June 02, 2005 at 11:30 PM
 ALGEBRA VS AL-QAEDA

Some things in our war on terror sometimes don't seem to add up. But that may be changing. See how solving math problems could solve some of our terror problems. How math can catch the bad guys. Two highly respected mathematicians explain how it works. These theories are being taken very seriously. After all, one of them was inspired by the film "A Beautiful Mind" and worked on the tv show "Numbers."
